CAPITAL	£100,000 <i>Stirling</i>
ANNUAL INCOME	£160,451 "
ROBUSES DISTRIBUTED	£240,000 "
RESERVED FUND	£707,000 "

Invested on Mortgage of Real Property, Government and other securities. To be able to pay all claims, meet all expenses, and at the same time create such a Fund, shows the prosperous nature of the business, and the secure basis on which the Society rests.

10 PER CENT. of the profits are divided amongst the policy holders.

£405,000 Sterling have been paid to the representatives of deceased assureds, the value of which to the Widow and Fatherless can never be told.

WHAT IS LIFE ASSURANCE?

It is the exercise of prudence. It secures independence and domestic happiness to the Widow and Orphan. It affords to persons in every class and in every situation in life, the means to avoid much future misery in their families, and to render them independent of public or private charity.

Admitting the uncertainty of human life, it behoves every head of a family, as well as all who have others dependent on them for support, to consider the position which his family or dependents would be placed in, supposing he were to die to-morrow. The great advantage offered by LIFE ASSURANCE, is the certainty of the family of the deceased Assurer receiving a stated amount, even if his death were to take place the moment after he had paid the first premium. Supposing a person insures his life for £2000; he is placed in precisely the same position as if he had deposited £2000 in the Bank, for the purposes of his family.

The Directors of the "STAR" have decided to appoint AGENTS throughout the Provinces of NOVA SCOTIA and NEW BRUNSWICK, who will receive a liberal remuneration for all business done by them. Applications, accompanied by testimonials, to be made to the GENERAL SUPERINTENDENT of the NOVA SCOTIA BRANCH, who will be happy to afford every information.

FIFTY PER CENT. SAVED

By manufacturing the Knit Goods used in the Family on the celebrated

LAMB FAMILY KNITTING MACHINE.

Most of its productions are such as no other Machine can make, as
IT SETS UP ITS OWN WORK,
WIDENS AND NARROWS AS BY HAND,
MAKES THE GENUINE SEAM OR RIB,
And a great variety of FANCY FABRICS.

These Machines can also be used to great advantage in the manufacture of goods for the market.

TESTIMONIAL.

Agent Lamb Knitting Machine.

DEAR SIR:—The Machine purchased of you last fall gives very good satisfaction. My wife had never seen one before, but had no trouble in learning to knit the various kinds of work that are laid down in your book. She thinks it much better than is represented in your circular; can knit four pairs of drawers or twelve pairs of stockings in a day, besides house work for the family.

It is not often that I buy an article that is better than is recommended. This is much better. The Machine attracts considerable attention in this vicinity, and no doubt you will have a call for more. I shall say all I can in your favor.

Yours, truly,

MANVILLE DURGIN.

MORNING AND EVENING PLANETS—1871.

Mercury will be an Evening Star until January 18; then a Morning Star until March 21; after that it will rise and set in daylight; but will be again visible as an Evening Star about the beginning of April—at which time it will set a few minutes after the Sun, increasing the interval to about two hours, then diminishing until 14th May, when it will rise and set with the Sun. May 21 it will rise about 15 minutes before the Sun, and continue a Morning Star until 11th July: it will then be in superior conjunction with the Sun. On the 15th July it will set about 40 minutes after the sun, and be an Evening Star until 13th September, when it will rise and set in daylight. It will again be a Morning Star from September 19th until the end of October, and an Evening Star from November 9th until the close of the year.

Venus will be an Evening Star from the commencement of January until 9th September, it then rises and sets in daylight. On 29th Sept. it rises about 15 minutes before the Sun, and will be a Morning Star the remainder of the year.

Mars rises on 1st January about 49 minutes before midnight, and will be visible during the remainder of the night,—the interval between the time of its rising and each succeeding midnight increasing,—until 22nd March, when it rises before sunset, and will be an Evening Star until the end of the year.

Jupiter will be an Evening Star until 30th June,—it will then be in conjunction with the Sun. On 9th July it rises about 20 minutes before the Sun, and will be a Morning Star. In the beginning of October it rises a few minutes before midnight, and (increasing the interval) is visible during the remainder of each succeeding night until the close of the year—when it will rise about an hour and a quarter after sunset.

Saturn is a Morning Star until June 27th. It rises about 40 minutes before the Sun on 1st January, and at midnight on 28th April,—after that it rises before midnight, and will be visible throughout the remainder of each night until the end of June; it then rises before sunset and sets at sunrise. It will be an Evening Star from the beginning of July until the close of the year—when it sets about 20 minutes after sunset.

In the Calendar pages, this mark ☾ opposite every alternate Friday, commencing January 13, denotes the days on which the mails are closed at Halifax (at 11 a.m.) per Steamers for Great Britain, West Indies, and Newfoundland.

The Sun's Declination and Equation of Time are given for Noon, the Moon's Declination for Midnight—Mean Time at Greenwich.

FOR THE LENGTH OF THE DAY.—Add 12 hours to the time of the Sun's setting, and from the sum subtract the time of rising.

FOR THE LENGTH OF THE NIGHT.—Subtract the time of the Sun's setting from 12 hours, and to the remainder add the time of rising next morning.

CARE of Live Stock requires much of the farmer's time and attention at this season. Feed sufficiently and water regularly; if you fail in either you cannot have profitable stock, whatever the breed may be. In most parts of the country farmers have now the means of improving their Stock by the importations made of late years by the Board of Agriculture. For the Dairy, Ayrshires are preferred; for large beef cattle, the Short Horn breed, which is increasing rapidly in King's Co. In Annapolis the Devons are well liked, and for active working oxen

EXOTIC EXTRACT removes Tan, Sun Burn and Freckles, and makes the skin beautiful. Every dealer should keep this on hand. Sold by M. F. Eagar, Halifax.

there is no better race. Where one or two cows are kept to supply a gentleman's family with the richest milk and cream, the Alderney breed is to be selected in preference to all others, but they are too tender for country farms, do not roam enough through the wild pastures, and stay about the barns waiting to be fed, while other cattle are fattening in the bush. The large Short Horns require rich level pastures, the Devons and Ayrshires are as hardy as the shaggiest mongrels. The Herefords are beautiful animals, but although a few have been imported, they have not come into favor in the Province.

THE HISTORY OF THE UNITED STATES

These worms are not likely to attack, and after the Canada plant has nearly attained its full growth, the whole should be covered with netting. It will not pay to pull the net away, as the Canada crop will not grow so late in the year. Cultures should be raised in the open field, which is better than in sheltered places. The netting should be put on a frame of poles, with a handle 9 feet long at one end, and a pole 4 feet long at the other, from the edge of the knoll, and, by pulling the instrument out, the whole net can be raised or lowered. The netting is fastened to the knoll by a cord with corresponding to the length of the handle, by means of a smooth cord. In some cases the pump is pulled the first, instead of being raised at the other after cutting, weather being dry, the plants are gathered up by two bundles, and no more are possible, by means of a pole, and into stacks, so that they are protected. It should be the work of one active man to cut, bind and stack, and in five days. Most American Hemp is made by "Dew Rattling," and it is known that the Hemp crop is spread out upon the field about October and dried in the fall the above mentioned. In "Water Rattling," and which yields a better article, the Hemp is immersed in bundles in a pond or pond till the fiber is ripe, and then taken out and dried. Afterwards the Hemp is put through a Break Mill, and is then ready for spinning.

DURING this month Sheep require more attention than at any other time. If they have not been well cared for during winter, some will die. If the early lambs are not looked for and tended many of them will die. Feed the ewes well, giving grain daily, as well as hay; shelter from the north and west winds, and have your sheds so protected that the south west rains will not drive into them. Do not shut up your old Sheep in the barn (except in severe frost) if you can help it, but they must be kept dry, and lambs must be kept warm. The finest breed of Sheep at the Exhibitions is the Cotswold, but it is not liked so well in Nova Scotia as the Canadian Leicester, (a larger

sheep than the English Leicester,) of which a considerable number have been imported and spread over the country by the Agricultural Board. They give very heavy fleeces of long wool, and large "quarters" for the table. These Leicesters are admirably adapted for improving the common breed of the country, as the cross shows at once increase in size and productiveness in wool. Thorough bred animals yield a fleece of from 15 to 20 pounds weight annually, and lambs from a common sheep with a thorough bred ram will, at a year old, yield a fleece of 10 or 12 pounds. Another breed has been imported more sparingly, viz.: the Southdowns; those are beautiful sheep, with short fine wool. For the table Southdown mutton and Southdown lamb is appreciated as superior to all others. If our farmers were to raise Southdowns in greater numbers, they would become known and sought for in our markets, and bring a better price.

OUR farmers do not depend so much as they used to do upon grass and hay. Within the last few years much more grain and roots have been grown than formerly. Wheat has succeeded remarkably well since the Canada Fyfe Spring Wheat and Winter Club were introduced. The former is now extensively cultivated, and although there are many thousands of bushels already in the Province, it is carefully saved for

seed, and the Board of Agriculture has a difficulty in meeting the wants of Societies; it is obvious, therefore, that it is well suited to the country, and its introduction has given a stimulus to grain culture. The Norway and Surprise Oats are likewise novelties, which every enterprising farmer will look after. One of the most profitable crops that can be grown is the Black Eyed Marrowfat Pea. It is found to be well suited to field culture in Halifax County and other parts of the Province, (where not too cold and wet,) and is very productive.

POTATOES are regaining favour as a Field Crop. Instead of being shipped off to the States, they are now largely used as winter feed for cattle. The number of cattle in the Province has considerably increased within the last few years, in some of our best farming Counties, and this will result in enriching the farms by an increase of manure, which the sale of potatoes to the Americans never would have done. It is carefully calculated that potatoes give a return of 30 cents per bushel when fed to cattle. We can, therefore, confidently recommend potato

culture for feeding as a profitable branch of farming, at least wherever manure is available for a start. One of the varieties best adapted for this purpose is the Pink Eye Rusty Coat, one of Goodrich's Seedlings, imported by the Board of Agriculture. It has now been grown in the Province for four or five years, has produced enormous crops, and a diseased tuber has never been seen on the wettest, richest or poorest land. The Early Rose is exceedingly productive, yielding 50 fold in good soil, without extraordinary culture. Bresee's Prolific, Climax and Worcester are likewise noted varieties of recent introduction. In taking up potatoes the potato digger is a great help, as one horse and man will do more work than half a dozen men with hoes.

Alum, Sulphur and Bluestone at Eggar's. See pa. 213.

THIS is the active month of the gooseberry and currant grub, which has within the last two years well nigh annihilated these fruits throughout the Dominion. Where do the grubs come from? During a fine day in May a yellowish fly, size of a house fly, but with two pairs of wings, may be seen hovering over the bushes. Its eggs are deposited on the under surface of the leaves, along the veins. Shortly the grubs are hatched, and commence their work of destruction; they feed and fatten, and cast their skins, and feed and fatten again, stripping the bushes of their leaves, and then when full grown they drop into the

earth, where they change into flies, and then come forth to deposit a fresh supply of eggs on such bushes as may have previously escaped destruction. There are several remedies. Hot water, not boiling, but hotter than the hand can bear, poured over the bush kills the grubs without injuring the plant. Hellebore Powder in water showered from a watering pot is more manageable and quite as effectual, if not more so. Lime and ashes dusted over the leaves wet with dew, are useful. The sovereign remedy is hand picking, which in the case of young bushes should always be resorted to. All these remedies are greatly strengthened by heavy manuring and high culture, which enable the bushes to throw out fresh shoots and leaves more quickly than the old ones are eaten.

Prescriptions carefully dispensed by BROWN BROTHERS & Co.

Odontine Essence never fails to cure Toothache.

THIS is Strawberry month, and every farmer ought to have a Strawberry bed in his garden, instead of having his children toiling morning, noon and night picking berries in the pastures. In a good Strawberry bed a painful may be picked in ten minutes in the cool of morning. The hardiest and best sort for common culture in our Province is "Wilson's Albany," which spreads very rapidly, does not freeze out in winter, and bears profusely if the runners are kept cut away early in the season. As an accompaniment to Strawberries, but not to be despised on its own account, *Clouted Cream* has been lately recommended as a suitable and marketable product of our dairies. It is thus made:—Let the milk from the cow after being strained be put aside in a pan until it is quite cool. The dairy pan may hold two gallons or thereabout, more or less. It may be of tin, a round open pan, less in

circumference at bottom than at top. Place it on a charcoal or slow fire without shaking, and let it remain until the milk is thoroughly heated, but it must not boil, during all which time the cream will be gradually rising to and forming a thick cake on the surface. Take it off the fire carefully, and lay it by to cool gradually. The result will be a rich pale yellow skin above, and from one half to an inch of solid cream below. As all the cream will be extracted from the milk and lie atop, the remainder will not be quite as good as the skimmed milk after making cream by the other process, but may be used for similar purposes. In the cups of cream, half pints, &c., brought to market (as prepared in Devonshire), the cup is filled with the solid cream, and then covered with a piece of sufficient size, of the rich yellow skin that forms the surface.

Haying begins in July, and is the most important of all operations to the Nova Scotian farmer. The great question is, When should hay be cut? It should be cut not earlier than the appearance of the "first bloom," and not much later than the passing off of the "second bloom."

Odontine Essence relieves Toothache and forms a stopping.

By this month the pastures become bare, dairy stock suffers, and the yield of butter grows small by degrees and uglily less. The remedy for this is to grow green fodder, to be cut and fed to the cows when they come home after their weary march over the pastures, or, what is better, to feed them entirely on green food in the barn yard; the increase of milk will be surprising. Indian Corn (the tall yellow corn) sown very thick in rich soil yields an enormous crop of green stalks that are greatly relished by cows and are productive of milk. Lucerne is another plant that stands repeated cutting, and as it has strong perennial roots does not require annual sowing. The only farmer in America who seems as yet to have succeeded

its cultivation is Mr. Thomas, at Windsor, N. S., who sowed it on a steep hill-side exposed to the coldest winds, and by the side of a strawberry bed; the severe winter of 1869 completely destroyed the strawberry plants but left the Lucerne comparatively uninjured. As to the yield it fully sustains its good character as a forage plant, the number of cuttings is almost double of what can be got from seed clover, and commence much sooner. Pigs are very fond of it, and no green food will they eat up quicker or cleaner. It is said that you can grow Lucerne for sixteen years in succession, and follow with two crops of wheat, and anyone who has seen the large development of roots can readily believe it to be so. Culture at Windsor:—Land, a wet clay loam, was underdrained and subsoiled to a depth of thirteen inches, then drilled up and dunged in drills, bone dust being sown on the dung, young plants kept clean first year. For perfect success, the subsoil should be dried to the depth of at least three feet.

Odontine Essence acts like Magic in curing Tooth-ache.

IN some parts of the country it is a common practice, when the hay is cut, to turn the cattle into the grass fields. It is, however, a very bad practice, and is never seen on good hay farms, except where there are rich marsh lands of vast extent, that cattle cannot injure. The following remarks by the Editor of the *American Agriculturalist* should be read by all farmers once a year:—

"It is a bad thing for all meadows to feed them after mowing, except that rare class where the vegetation is too rank to make good hay. If a field cuts four tons of hay to the acre, feeding a few days might not harm it. But for ordinary mow-

land cutting only half as much, grazing cannot fail to reduce the next year's crop, and to shorten the period during which the land can be kept in grass. We noticed this summer in an old meadow the great difference in the yield of hay inside of an old stack-yard, and upon the adjoining land. The circle where the fence stood was very distinctly marked by the ranker growth of grass. Outside, there had been grazing all through the fall. Inside, the fence had protected the grass. Though the outside had the droppings of the cattle, yet the yield upon the inside was at least a third more, and there was no other noticeable cause than the difference in grazing. It is true that by pursuing this plan there is more old fog upon ungrazed land, but that is just what the roots of grasses need for their winter protection. The ground does not freeze so deep, and the grass starts earlier in the spring and makes a larger crop of hay."

ONE of the greatest comforts of a country home is the perennial supply of Vegetables.—asparagus, parsnips and spinach in spring; in summer, peas, salads, beans, cauliflower and many others; and in winter, carrots, turnips, cabbages, greens, celery, &c. But comparatively few of those who live by farming grow many of these things.

This is either the result of ignorance or of neglect; for a farmer's first duty is to supply his own household. Most persons begin their gardening in

Odontine Essence cures Toothache.

The care of Farm Implements and Machinery is too much neglected in Nova Scotia. At this season of the year, it is necessary to see that all such are in good order, and carefully stored in the sheds and barns from the inclement weather of winter, and so as to come out bright and ready for use on the approach of spring. All mud and rust should be washed and scraped off, and the metallic parts moistened with grease or oil. All the work that one man can do upon a farm during the course of a year is small, that even the poorest farmers should take advantage of every labour saving implement and machine that is not too costly. Horse labour is cheaper than man's, yet, for want of proper appliances we often see the horse

"eating his head off" in the barn, whilst his master is toiling away out-
side. The potato digger enables a horse to throw out ten times the quantity
of potatoes that a man could dig in a day. The horse-rake saves an im-
mense amount of tedious labour in the hay season. Mowing machines are
not uncommon now in all our best hay districts. To promote health and
comfort of live stock and economy in feed, there are the numerous forms of
cutters and root slicers. In order that these mechanical inventions may
be beneficial to the farmer, he must take some pains to learn how to use
them, and how to keep them when they are not in use. There should be a
convenient water-tight shed large enough to hold all the carts, ploughs,
waggon and machines, with a rack near the door for spades, shovels,
hoes, &c. A place for everything and everything in its place.

This is one of the largest and most successful of the Life Assurance Institutions of Great Britain.

"THE STANDARD" has acquired a marked character for liberal management, being the first institution which relieved Policies of Assurance from restrictive and unnecessary conditions, and gave such contracts increased value and stability in other ways.

Thirty days of grace allowed for payment of Premiums, and Policies valid meantime.

Forfeited Policies revived within thirteen months under certain conditions. Policies of five years duration unchallengeable on any ground connected with the original documents.

Policy holders permitted, without payment of extra premium, to join Militia, Yeomanry, and Volunteer Corps, and to perform any military duties required of them in peace or war in defence of their country.

Unconditional Policies, without any restriction as to residence, granted on lives of persons settled in life.

Surrender value of Policies ascertained by a fixed scale.

CAPE ST. MARY'S—East side of entrance to St. Mary's Bay, Digby Co. A revolving light, attaining its greatest brilliancy every minute, and showing alternately red and white faces, 100 ft. above high water. White octagonal building. Lat. 44° 04' N. Long. 66° 08' W.

BRIER ISLAND—Situate on the western side. A fixed white light, 92 ft. above sea level, visible 15 miles. Octagonal white building.

WESTPORT—On Peter's Island, at the S. entrance of the E. side of the Bay of Fundy. Two white fixed lights, placed horizontally, to distinguish it from Brier Island Light, 40 feet above high water mark, visible 10 miles, and is intended to lead vessels into Westport, or through Grand Passage. Square white building.

BOAR'S HEAD—N. entrance Petite Passage, Bay of Fundy. Alternate flashes, red and white, at intervals of 60 seconds. Square white building.

DIGBY GUT—On Point Prim, at the entrance of the Gut. A fixed white light, 76 ft. above high water, and visible 13 miles. Building square, painted red and white vertically.

PORT WILLIAMS—Two fixed white lights, 20 feet apart, perpendicularly, visible from all points of approach. Square white building. Port Williams is distant from Digby Gut Light E. 25 miles; and from Black Rock W. 28 miles.

MARGARETVILLE—A red fixed light, visible 10 miles from all points of approach. Building square, painted in white and black horizontal stripes. Margaretville is distant E. 37 miles from Digby Gut Light, and W. 15 miles from Black Rock Light.

BLACK ROCK—A white fixed light, 55 ft. above the level of high water, and visible 12 miles. Square white building.

SPENCER'S POINT—A white fixed light is placed on the top of a building at this point, on the northern shore of Cobequid Bay, near the head of Minas Basin.

APPLE RIVER LIGHT—On Hetty Point, N. side of the entrance to the River, and three leagues to the eastward of Cape Chignecto. Two fixed horizontal lights, 40 feet above high water, visible 10 miles. Square white building.

PARRSBORO'—On the W. side of the entrance to Parrsboro' River. A fixed white light, 30 ft. above high water, visible 9 miles. Octagonal white tower, standing close to high water mark on the beach.

H. H. FULLER & CO., Noble's & Hoare's Coach Varnishes

HORTON BLUFF—A *white fixed light*, 95 ft. above high water level, (rise and fall 40 to 45 ft.) visible in clear weather over the greater part of the Basin of Minas (after passing Cape Blomedon) and above the Five Islands and up to Windsor River, until intercepted by the continuation of the Bluff to the southward of it. Square white building, standing 66 feet from the Bluff.

BURNT COAT HEAD—The lantern is erected on a square tower attached to the main building. A *white fixed light*, 75 feet above high water level, and visible from all points of approach.

GANNET ROCK—The Gannet Rock is 66 feet above high water, and has a light house upon it, painted black and white, in vertical stripes. A *fixed white light* (visible 12 miles) lies S. W. by S. distant $3\frac{1}{2}$ miles from the southern point of Three Islands, and S. S. E. $\frac{1}{2}$ E. 7 miles from the S. W. head of the Grand Manan. A gun is fired to answer signals during a fog. There are a number of small ledges and sunken rocks about it, which are always breaking. The light stands conspicuously in the immediate vicinity of all the sunken rocks and dangers, extending from the old Proprietor to the Seal Islands of Machias, a distance of about 20 miles. Between the northernmost and southernmost of the Murr Ledges there is a range of dangerous rocks and shoals, many of them above water, and which extend westward from the light house about 4 miles. From this range farther westerly, about 6 miles, lies a dangerous breaker, called the Bull. This may be avoided by keeping three remarkable headlands, near the S. W. end of Grand Manan, open.

MACHIAS SEAL ISLAND—S. W. by W. $\frac{1}{2}$ W. from Grand Manan, lie the Machias Islands. On the eastern island two light houses are erected, *showing fixed lights*, distant from each other about 200 feet in the direction of E. S. E. and W. N. W., by which they are easily distinguished from all other lights on the coast. Elevated about 54 and 58 feet above high water, visible 15 miles. A gun is fired every four hours during a fog. Both buildings white.

GRAND MANAN ISLAND—On Swallow Tail Point, N. E. side of the island. A *white fixed light*, 148 ft. above higher water, visible 17 miles. Building white, Lat. $44^{\circ} 45' 22''$ N. Long. $66^{\circ} 44' 4''$ W. This is a conspicuous mark in the S. Channel between Brier Island and Grand Manan.

LITTLE RIVER—On an island at the entrance of the River. A *fixed white light*, varied by flashes every 90 seconds, 40 feet above high water, visible 11 miles.

QUODDY HEAD—On the S. E. side of Quoddy Head. A *fixed white light*, 133 feet above sea level, visible in clear weather 17 miles. It bears from the Southern point of Grand Manan N. $\frac{1}{2}$ E. 13 miles, and from the Northern point of said island W. N. W. $7\frac{1}{2}$ miles. Has a fog trumpet.

CAMPO BELLO—On the N. E. extremity of the island. A *white fixed light*, 64 ft. above the sea, visible 15 miles. Building white with a red cross. This light enables vessels to enter Head Harbor at all times. It is also a guide to vessels entering the main channel, to West Isles, Moose Island, and the inner Bay of Passamaquoddy.

POINT LE PREAU—upon this projecting head land *two fixed white lights*, one above the other, distant 28 feet. The lower lantern is fixed to the outside of the building, and throws its light quite inshore, both to the eastward and westward into Mace's Bay. The highest light is

Letter Rates.

Local Letters, if pre-paid, 3 cents per half ounce.

Local Letters, if unpaid, 5 cents per half ounce.

If a letter is posted partially unpaid, the charge on delivery will be the same as if wholly unpaid, deducting, however, any amount that may have been pre-paid upon it. Letters mailed for delivery at the office where posted, 1 cent each; must be prepaid by stamp, otherwise they will be returned to the writer. Letters are re-directed from one place to another without any further charge. On letters remailed from the Dead Letter Office, 5 cents additional.

Letters to Non-commissioned Officers and Privates, whether in Her Majesty's Service or Canadian Volunteers whilst on active service, pass, if pre-paid, for two cents each, when not over the $\frac{1}{2}$ ounce; if over $\frac{1}{2}$ ounce, ordinary letter rates.

On letters for P. E. Island, the charge is 3 cents per $\frac{1}{2}$ oz. paid; unpaid, 5 cents; to Newfoundland 12 $\frac{1}{2}$ cents—pre payment required.

Postage on letters to British Columbia and Vancouver's Island is 10 cents per $\frac{1}{2}$ oz. must be pre-paid. An additional sea-rate from San Francisco is charged on delivery. The rate to Red River, *via* United States, is 6 cents per $\frac{1}{2}$ oz.—must be paid in advance.

Letters for the United States is 6 cents per $\frac{1}{2}$ oz., if pre-paid; if unpaid, or only partially paid, 10 cents per $\frac{1}{2}$ ounce.

Letters sent by way of the United States, if addressed *via* New York may be forwarded to the Brazils, Acapulco, Aspinwall, Costa Rica, Guatemala, Cuba, Mexico, Nicaragua (Pacific side), Panama, St. Thomas, Sandwich Island, Venezuela, and the British West Indies for 10 cents per $\frac{1}{2}$ oz. which must be pre-paid by postage stamps.

To Bermuda, the British and Foreign West Indies, by British mail packet from Halifax, monthly, the charge is 12 $\frac{1}{2}$ cents, which must be pre-paid.

Via New York to Guadaloupe, Hayti (St. Domingo), Martinique, Port Rico, Santa Cruz, the postage is 22 cents per $\frac{1}{2}$ oz. By the same route to Bolivia, Ecuador, Valparaiso, Honduras, Mexico, *via* Havana, Nicaragua (Gulf of Mexico side) Callao, Lima, 34 cents per $\frac{1}{2}$ oz.

Letter rates to the United Kingdom, if by Canadian Packet and Inman Line from Halifax, not exceeding $\frac{1}{2}$ oz., 6 cents. Exceeding $\frac{1}{2}$ oz. and not exceeding 1 oz., 12 cents. Exceeding 1 oz. and not exceeding 1 $\frac{1}{2}$ oz., 18 cents, and so on increasing, one rate of postage for each additional $\frac{1}{2}$ oz. If letters for the United Kingdom are posted unpaid, they will be charged a fine of 3d. sterling in addition to the postage on delivery.

The postage on letters by the Cunard line from New York, is 8 cts. per $\frac{1}{2}$ oz., and an additional 8 cents for every $\frac{1}{2}$ oz., with a fine of 3d. sterling if posted unpaid or only partially pre-paid.

Mail Matter exempt from Postage.

All mailable matter, sent to or by the Governor-General, or sent to or from any Public Department at the Seat of Government at Ottawa, or to or from any member of the Legislature at the Seat of Government during the Session, or ten days before the meeting of Parliament.

Registration of Letters.

Parties posting letters containing articles of value should have them

BROWN BROTHERS & Co., Pure Chemicals and Toilet Articles.

H. H. FULLER & CO. Patent Bell Fasteners.

registered, and obtain a certificate of such registration from the office when posted.

The registration fee on letters circulating in the Dominion, P. E. Island and Newfoundland, is 2 cents; on letters to the United States, 3 cents; and on those for the United Kingdom, 8 cents; the British Colonies, see Colonial Election Postage. The registration fee, together with the postage, should be pre-paid by postage stamp.

The object of registration is not to make the Postal Authorities responsible, but in order that a letter or package may be traced through the various offices through which it passes, and which loss is occasioned by the negligence or carelessness of any party through whose hands it has passed, such individual is bound to make good the amount or value of such package.

Parcel Post.

Parcels may be posted for circulation in the Dominion only, at the following rates, which must be paid in advance:

Not exceeding 8 ounces 12 1/2 cents; above 8 ounces and not exceeding 1 lb. 23 cents; above 1 lb. and not exceeding 1 1/2 lbs. 37 1/2 cents; above 1 1/2 lbs. and not exceeding 2 lbs. 50 cents. Registration fee 3 cents.

No parcel to exceed 4 lbs. in weight. No letter must be enclosed. No parcel shall contain anything liable to injure the mail. The size is limited to two feet in length, one foot in breadth or thickness. The postage must be pre-paid by stamp. Unpaid parcels will not be forwarded, but short paid parcels will be sent on with a fine of 12 1/2 cents in addition to any postage that may remain unpaid.

Pattern and Sample Post.

Patterns or samples of merchandise may be transmitted within the Dominion at the rate of 1 cent per oz., pre-paid by postage stamp, and may be forwarded on payment of a fee of 3 cents. Short paid packages or samples will be fined 3 cents. No packet should exceed 24 ozs., or be more than 24 inches in length, or 12 in depth, or breadth. No box should be enclosed, or anything liable to injure the contents of the mail. Parcels should be so made up that they may be easily examined by the officers of the Post Office.

Pattern and Sample Post with the United Kingdom, British Colonies, and Foreign Countries.

The following are the regulations for the transmission of Samples and Patterns of merchandise between the Dominion of Canada and the United Kingdom.

1st. Samples of goods, drugs, and similar articles for delivery in the United Kingdom, may be sent in bags entirely closed, provided such bags be transparent.

2nd. Scissors, knives, razors, forks, steel pens, nails, keys, watch movements, metal findings, pieces of metal or iron, and such like articles are allowed to be forwarded by post as samples, to the United Kingdom, Germany, and Belgium, provided they be packed so as not to injure the mails and the officers of the Post Office. They must be so packed as to be easily examined. Any packet found to be insufficiently packed will not be forwarded.

Patterns or samples of merchandise non-circulate between Canada and the following countries, but must not exceed the following weights and sizes:—

Ship Letters.

Letters by private ship, from the United Kingdom, in ship letters, 2 cents, if addressed to the port of arrival, and to other places in the Dominion, 3 cents. Loose ship letters from the United Kingdom, British Colonies, and Foreign countries, 4 cents. From places in the Dominion, if addressed to the port of arrival, 4 cents; and to other places in the Dominion, 5 cents. The Postmaster General may make such reasonable compensation, as he may see fit, to masters of vessels not being Post Office Vessels, for each letter conveyed by such vessels between places beyond the sea and the Dominion, and may direct that at any port such vessels shall not be permitted by the Officers of Customs to enter or break bulk until all letters have been delivered at the Post Office, nor until the master has made a declaration that he has delivered all.

The Postmaster General has the exclusive privilege of transmitting letters within the Dominion; and except in the cases hereinafter mentioned any person collecting, sending, or delivering letters, incurs a penalty, not exceeding \$20, for each and every letter so conveyed or found in his possession. Such penalty not to apply to, 1. Letters sent by a private friend, provided such letters be delivered by such friend to the party addressed; 2. Letters sent by a messenger on purpose, conveying the private affairs of the sender or receiver; 3. Commissions or warrants thereof, issuing out of a court of Justice; 4. Letters addressed to a place out of the Dominion, sent by sea and by a private vessel; 5. Letters lawfully brought into the Dominion, and immediately posted at the nearest Post Office; 6. Letters of merchants, owners of vessels, or of the cargo or loading therein, sent by such vessel, or by any person employed by such owners for the carriage of such letters according to their respective addresses, and delivered to the persons to whom addressed, without pay or reward for so doing; 7. Letters concerning goods or merchandize sent by known common carriers to be delivered with the goods, without pay or reward; 8. Nothing herein contained to authorize any person to collect any such excepted letters for the purpose of sending or conveying them. EXPLANATION OF SIGNALS

Made at the Ship Staff at Citadel Hill, when Vessels are seen from the Citadel or reported from an Outpost.

For 1 Square Rigged Vessel, 2 balls close up, one on the outer halliard and one on the inner halliard.

" 2 Do, 1 ball hoisted on the outer halliard, and 1 close up on the inner halliard.

" 3 Do, 2 balls close up, one out and one in.

" 4 Do, 2 balls separated, and one close up on the inner halliard.

" 5 Do, a pendant of any colour on the outer halliard, and one ball close up inside.

" 6 Do, a pendant under a ball close up on the outer halliard, and a ball at the inner halliard close up.

" 7 Do, a pendant over a ball close up on the outer halliard, and a ball close up on the inner halliard.

" 8 Do, a pendant under two balls close up on the outer halliard, with a ball close up on the inner halliard.

" 9 Do, a pendant between two balls close up on the outer halliard, with a ball close up on the inner halliard.

" 10 Do, a flag of any colour close up on the outer halliard, with a ball close up on the inner halliard

The above balls, &c., are hoisted on the east or west yard arm, according to the *quarter* the vessel first appears in.

When Sailing Vessels are reported from an Outpost, the following signals are made on the lower yard, now used exclusively for sailing vessels, as repeats :—

For a Square Rigged Vessel, two balls of a size, one at the outer, the other at the inner halliard, close up.

A Ship, a large ball at the end of the yard, with a small one at the inner halliard.

A Barque, a large do. at the end, with a small one dropped at the inner halliard.

A Brig, a small ball at the end of the yard, and a large one at the inner halliard.

A Brigantine, a cross close up at the outer halliard. Two or more do., a cross half hoisted.

A Topsail Schooner, a cross close up at the inner halliard.

The upper yard of the Ship Staff is used solely to designate Steam Vessels, thus :—

Two large balls close up, one at the outer and the other at the inner halliard, E or W, a steamer reported in that quarter.

A small ball at the outer, and a large one at the inner halliard, a second class Packet or Merchant Steamer.

A large ball at the outer, and a small one at the inner halliard, a Man-of-War Steamer, or Royal Mail Steamer, or large Merchant Steamer.

Two lanterns, one *red* and the other *white*, are hoisted at night to denote a Steamer reported.The *red* lantern is always shown at the end of the yard arm, and the *white* one at the inner halliard, E or W, according to the quarter the Steamer is reported in.

H. E. FULLER & CO., Permanent Wood Filling.

Numbers are indicated the same as on the lower yard.

When the description of vessel is ascertained, the following descriptive colours will be hoisted at the masthead:—

A Union Jack—a Flag Ship.

Man-of-War Screw Steamer, a white pendent with a *blue* ball in the centre, *over* the Union Jack.

Man-of-War Paddle Steamer, a white pendant with a *blue* ball in the centre, *under* the Union Jack.

BELCHER'S FARMER'S

[1871.]

The Canada Life Assurance Company.

Established 1847. Capital, \$1,000,000.

Incorporated by Special Act of Parliament.

HEAD OFFICE, HAMILTON, ONTARIO.

DIVISION OF PROFITS, 1870.

Comparative Table, shewing the Profits to Policy-holders, on Policies 5 years in force, payable either in Cash or in diminution of premiums for the next five years, as compared with the annual premium.

AGE.	PREMIUM.	PROFITS.	
	Annual Rate.	Cash.	Annual Reduction.
21	\$16.80	\$25.44	\$5.99
25	19.00	27.95	6.60
30	22.30	31.41	7.47
35	25.70	34.95	8.22
40	30.50	39.34	9.45
45	35.90	43.76	10.54

EXAMPLES.

"CASH" PROFITS.

I.—The holder of a Policy for \$4000 of five years' standing, commencing at age 30, will receive, as his share, \$125.60. This will not only pay his annual premium, amounting to \$89.20, but leave him a surplus in cash of \$36.40, or more than 40 per cent., in addition to a full year's payment.

REDUCTION OF PREMIUMS.

II.—The holder of a Policy for \$5000 of five years' standing, commencing at age 30, is entitled during the next five years to an annual diminution of his premium to the extent of \$37.35.

Thus.—From his annual premium.....\$111.50
Deduct as above.....37.35

Which reduces his payment to.....74.15
or two-thirds his original premium. The next division will take place in 1875, when another allotment of profits will be made in like manner.

BONUS ADDITION.

III.—Whole Life Policies, whose holders take their profits in this way, are now increased in value at the rate of $2\frac{1}{2}$ per cent. for each year they have run. Thus the addition to policies dated prior to 30th April,

1866,	} is,—for each \$1000,	{	\$125.00
1867,			100.00
1868,			75.00
1869,			50.00
1870,			25.00

N. B.—These results have been accomplished, after making ample provision for all the liabilities of the Company, notwithstanding the economical rates of premiums charged by the Canada Life, giving a present and continued assurance larger in amount for a given premium than other offices.

Attention is called to the fact that the Cash Bonus returnable to policy-holders of 5 years' standing, is equal to from 20 to 50 per cent IN EXCESS OF A YEAR'S PREMIUM; in other words, these policy-holders will not only have NOTHING TO PAY THIS YEAR, but will be MONEY IN HAND BESIDES.
